

How to integrate with HaoEcommerce

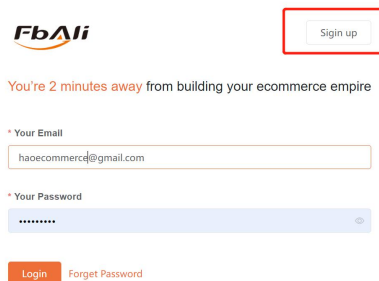

1. Install the App: FbAli on Shopify App Store

Install from Shopify Store or from our official website: <https://fbali.co/>

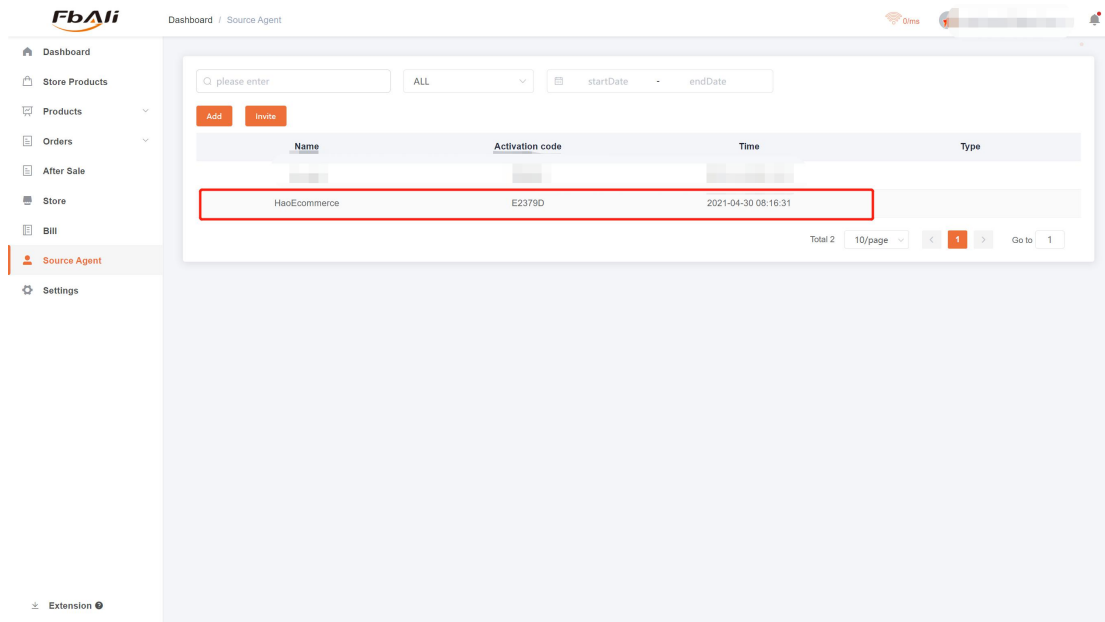

2. Register an account

Register by your own email

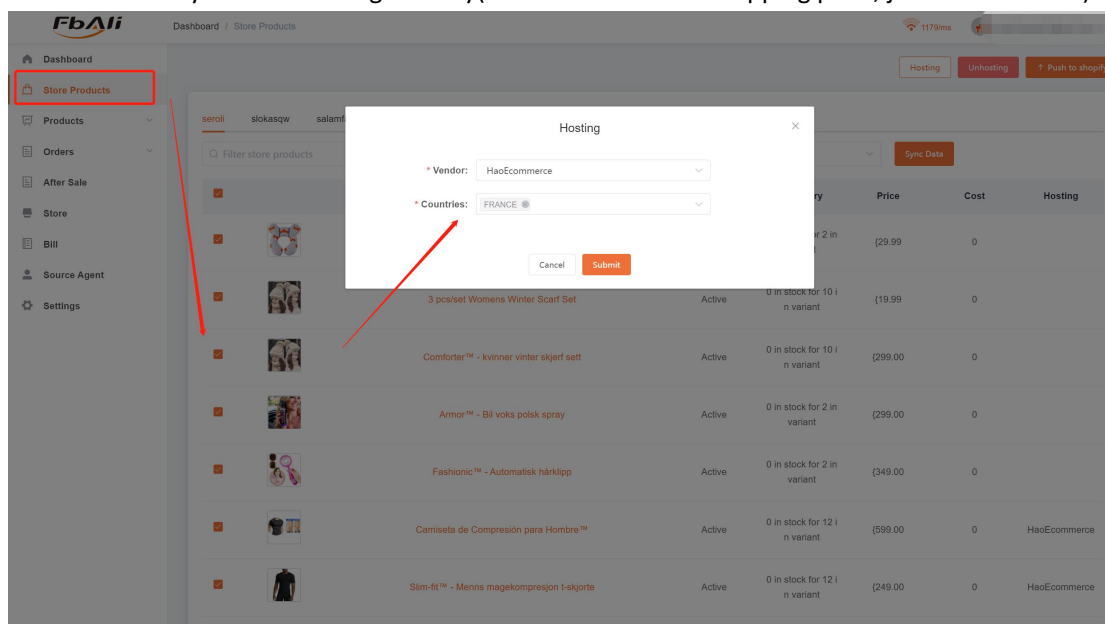

3. Add a source agent code: E2379D

4. Host the product you want to be fulfilled by Us

1. Select "Store Products"
2. Select the products that you want to host
3. Choose the vendor : HaoEcommerce
4. Choose your main selling country(It doesn't affect the shipping price, just for reference)

5. Push the old orders

After you hosting the products, the orders of those products will be uploaded to our system automatically, and we will fulfill them every day. But you need to push the orders before you hosting the products.

The screenshot shows the FbAli dashboard with the 'Orders' menu highlighted in the sidebar. The main table displays a list of pending orders. The 'Vendor' column is highlighted with a red box, indicating that no vendor is assigned to these orders.
